## Education

---

2013 – 2017  
Ernakulam, India  
**Bachelor of Technology in Computer Science,**  
*SCMS School of Engineering and Technology*  
CGPA 7.57

## Projects

---

- 07/2021 – present      **DDO Chatbot & Messaging System** [!\[\]\(31b03e46ee8a80a1f1467b8c03bd76e8\_img.jpg\)](#)
- Implemented a chatbot that is used by advisors and distributors of various financial products and funds in Australia to raise complaints and lodge Dealings.
  - The Chatbot can be white-labeled by the admin of different organizations.
  - Converted Figma wireframes to React Components, utilized HTML5, Sass, tailwind.css, React JS for UI development, and Jest for testing React Components.
- 01/2021 – 06/2021      **BCG Intelligent Automation** [!\[\]\(7d9665ff04f9d2270c38081c6215a724\_img.jpg\)](#)
- It is a fund management platform to process unit price file attachments from a mail service using machine learning and later publish it on a private blockchain.
  - Created a dashboard to view, filter, and search fund data using React.js and Material UI.
- 06/2020 – 12/2020      **Scorpio Vessel Catering Management System**
- Scorpio is a web application for catering management in ships that is used to make purchase orders, stock updates, invoice generation, calculate the victualing rate, etc.
  - Collaborated with 4 other front developers and built the web app using React JS and tailwind.css.
- 03/2019 – 01/2020      **Cortex**
- It is a task management tool like Jira that was used internally in the company.
  - Developed a lightweight and fully customized table component with sorting and pagination using React Table.
- 09/2017 – 02/2019      **HUE-AC-V4**
- It is a cloud-based ERP system based on machine learning technologies to automate tasks and improve processes and is developed on Java and jQuery.
  - Involved in Quality Assurance of the application and fixing bugs and other performance issues.
